

Defining ITB Therapy and Best Practices

You're invited! Please join us for an intriguing and interactive discussion with one of the nation's leading experts in spasticity management

Wednesday, February 20, 2019

7:30 PM AST

**SHERATON PUERTO RICO HOTEL & CASINO. The Laguna Room 2
200 Convention Boulevard, San Juan, PR 00907**

Featuring:

Lizette Alvarez, MD
Missouri Baptist Medical Center
Director, Inpatient Rehabilitation Unit
Director, Outpatient Rehabilitation Unit

Program Description and Objectives:

Severe spasticity of spinal or cerebral origin is challenging to control effectively. ITB Therapy is an established and widely accepted treatment option for severe spasticity and has been proven useful for long-term control for some patients. Comprehension of consensus statements and practice guidelines aid in the safe and effective delivery of ITB therapy.

This program will focus on:

- Defining ITB Therapy and appropriate candidates
- Best practices for ITB Therapy processes
- ITB Therapy clinical, safety, & cost-effectiveness data for indicated spasticity patients
